

Electric forklift

40/45/50B-9

A NEW HEIGHT IN CUSTOMER SATISFACTION

Battery forklift with robust AC technology

Hyundai is proud to introduce its new 9 Series battery forklifts – a range of high-performing four-wheel counterbalance trucks featuring numerous upgrades for better performance and productivity. These include a powerful dual drive system, easier maintenance and a spacious, fully equipped driver compartment with excellent visibility.

Productivity & Efficiency

SMOOTH, EFFICIENT
PERFORMANCE TO BOOST
YOUR PRODUCTIVITY

The robust yet compact 9 Series design is packed with technologies that promote smooth, quiet operation and optimal performance. The strong dual drive system improves manoeuvrability and stability to ensure operators get the most out of every working day. It is combined with a powerful AC motor that improves efficiency while keeping maintenance to a minimum.

Excellent gradeability and travel speed
As well as good stability, 9 Series machines offer outstanding gradeability and fast travel speed on rough terrain and slopes.

Curve Control
The Curve Control system limits travel speed based on the turning radius, ensuring that turning manoeuvres are smooth and accurate.

Powerful dual drive system
The dual drive motor system consists of two separately controlled, low-noise drive motors ensuring excellent drawbar pull and a short turning radius. The system provides powerful performance, even on uneven roads, and improves logistics efficiency in narrow workspaces.

Tailored performance for different working conditions
Different working modes optimise the forklift's performance depending on parameters such as speed of operation, maximum working time and operator proficiency.
H: High Performance mode with fast driving and lifting speeds
N: Normal mode with balanced performance and energy consumption
E: Economy mode maximising battery autonomy

Strong, economical AC motor
The enclosed drive and pump motor with AC technology combine power, high durability and zero maintenance. The brushless AC motors improve efficiency while also reducing ownership costs.

Auto fork levelling system
This feature ensures that mast tilting stops smoothly when the forks are in a level position, improving both productivity and safety.

Fingertip control lever and adjustable armrests
The electric control lever makes operation almost effortless. The ergonomically designed armrests can be adjusted up and down and from front to back, to fit different body shapes and reduce fatigue.

Directional control and horn switches on lever
An electronic directional control switch and secondary horn switch are mounted on the hydraulic lift lever to allow for quick, precise manoeuvring.

Operating comfort

ERGONOMIC
COMFORT AND QUICK,
EASY MAINTENANCE

The ergonomic design prioritises a comfortable operating position with easy reach to the most essential controls. We also focused on convenient machine monitoring and maintenance access in order to minimise downtime and allow operators to focus on the job at hand.

Spacious, fully equipped cabin
The ergonomically designed operating space allows more room for the driver as well as a wide field of view from the seat. It is equipped with smooth-functioning, easy to operate levers and pedals, a tiltable steering wheel, a suspension seat and a large multi-function dashboard and display. The 12V power socket allows drivers to charge or power external devices..

3.5 inch LCD colour monitor
The LCD colour monitor simplifies control and improves efficiency by providing information on the speed and accelerator level, steering angle, travel direction and working mode. It also displays operation errors, system faults, battery level, hour meter and various other data, enabling the operator to maintain the forklift in optimum operating condition and simplifying planning for maintenance.

- Main monitor functions
- | | |
|--|-----------------------------|
| 1 Advanced LCD monitor | 7 Wrench warning light |
| 2 Steering wheel position and travel direction | 8 Scroll up |
| 3 Turtle mode | 9 ESC |
| 4 Speed (digital) | 10 Menu/Scroll left |
| 5 Battery discharge indicator | 11 Performance/Scroll right |
| 6 High temperature warning lamp | 12 Enter |
| | 13 Turtle/Scroll down |

Speed adaptive steering
The steering angle sensor displays the machine's travel direction on the screen. The speed of the truck is reduced as the steering angle increases.

Optimised pedal position and floor mat
The accelerator and brake pedal are positioned for optimal ergonomics.

Easy battery maintenance
The battery cover opens fully to improve access. It is equipped with locking gas springs for safe and easy maintenance.

Brake oil reservoir with level sensor
The enhanced brake oil reservoir, located in the upper left dash, is equipped with an electronic level sensor that alerts the operator with an audible alarm when the level is low.

Adjustable steering column
The steering column can be adjusted to the operator's preferred position using a single lever.

Grammer seat
The 9 Series features a wide, high-quality Grammer seat allowing the operator to work comfortably and reducing fatigue. The suspension, armrests and backrest are adjustable and seat heating can be integrated as an option.

OPTION

Safety

EXTENDED VISIBILITY
AND ENHANCED
SAFETY FEATURES

With great all-round visibility, a panoramic mirror and an optional rear camera, the 9 Series is designed to help operators work productively in an accident-free workplace.

Increased fork safety

The down-control valve maintains a controlled descent speed as the forks are being lowered. The down-safety valve prevents forks from dropping suddenly if the hydraulic line is damaged.

Anti-rollback system

The 9 Series forklifts feature an anti-roll-back system that prevents them from rolling back on a slope and offers exceptional drive-off capabilities.

Operator Presence Sensing System (OPSS)

OPSS detects when the operator is not in the seat and automatically locks out the hydraulic lift and tilt controls and travel function.

Speed limiter

Depending on the working environment, the maximum speed can be limited via the cluster from 10 km/h to 1km/h.

Turtle mode

Turtle mode can be selected in narrow or congested spaces to automatically reduce the travel speed to a preset value.

LED lights and rear reflectors

Long-lasting LED combination lights and halogen headlights promote working efficiency by providing clear visibility in all circumstances. Rear reflectors mounted on the counterweight enhance safety for the driver and the machine.

Strong overhead guard

Exceeding EEC and ANSI requirements, the overhead guard offers excellent protection without restricting visibility.

Excellent visibility from the driver's seat

The lift cylinder arrangement has been optimised to provide good visibility for the operator. A panoramic mirror provides a wider view when reversing and a rear camera can be added as an option to further enhance safety.

Walk-around

40/45/50B-9

Productivity & efficiency

- Dual drive motors for powerful, precise driving performance
- Performance optimised for various working conditions
- Spacious, ergonomically designed operator space
- Fingertip controlled mini-levers **OPTION**
- Ergonomically designed directional & horn switch located on hydraulic controls
- Auto fork levelling **OPTION**
- Load weight indicator **OPTION**

Durability & reliability

- Enclosed drive and pump motor
- Brushless AC motors

Comfort

- Grammer seat as standard
- 3.5 inch colour LCD monitor

Safety

- Speed adaptive steering feedback increases driving stability
- Curve Control reduces driving speed when entering a curve
- Anti-rollback feature prevents rolling backwards on a slope
- Maximum driving speed setting
- Operator Presence Sensing System (OPSS)

Easy maintenance

- Easy access to battery
- Side battery removal
- Electronic brake oil sensor
- Smart display provides alerts and warnings of electric system failure

Parts & Warranties

HYUNDAI GENUINE PARTS AND WARRANTIES: THE BEST WAY TO PROTECT YOUR INVESTMENT

Hyundai Genuine parts, accessories and warranty programmes are specially designed to keep your investment covered. They increase uptime and maintain the performance, comfort, and convenience that are built into your equipment.

Leader in standard warranties for battery Forklifts!

Hyundai warranties are designed to give you the cover you need to build your business with confidence and peace of mind.

Best standard warranties in the industry

For extra reassurance, and to ensure maximum customer confidence, we are supplying all new battery models with best industry standard warranties.

The forklift **standard warranty covers you for two years or 3,000 hours, whichever comes first.**

Optional and extended warranty periods

In addition to this standard coverage, optional and extended warranty periods are available, allowing you to benefit from full warranty coverage for longer, and even over the full service life of your forklift.*

Forklift standard warranty*
2 years
 or 3,000 hours,
 whichever comes first.

Hyundai Genuine parts

Hyundai Genuine parts have the same design as those installed when your machine left the factory. They are subjected to rigorous quality inspections and tests to make sure they meet Hyundai's strict requirements for quality and durability.

As well as minimising downtime, this helps to ensure peak performance on every task. In the 13,000 m² warehouse, **Hyundai covers over 96% of all Genuine Parts.** With one of Europe's most advanced automated warehousing systems, we are able to maintain availability and efficient delivery of all our Genuine Parts.

A network you can rely on

HCEE prioritises quick, reliable intervention to keep your equipment running reliably. Thanks to the **extended dealer network across Europe, we will always be close by to ensure a timely and efficient solution.** Moreover, we guarantee a 24-hour delivery service across our European dealer network.

* Conditions apply. Please discuss the optimal solution for your needs with your dealer.
